

To study for the upcoming unit test on radicals, exponents, and logarithms, use:

- Your notes and questions done in class
- Radicals: study guide + assessment on rules for radicals
- Exponents: work package on exponents and "More questions on exponents" pdf
- Logarithms: worksheet on logarithmic equations
- Mixed review questions printout (solutions can be found in our Google drive folder)

The following formulas will be provided on the test:

$$\log_a xy = \log_a x + \log_a y$$

$$\log_a \frac{x}{y} = \log_a x - \log_a y$$

$$\log_a x^m = m \log_a x$$

$$\log_a x = \frac{\log_b x}{\log_b a}$$
