

DIS Department of Mathematics

MYP Grade 10 Extended Mathematics

Course Outline

Welcome! This handout will give you all relevant information about your Mathematics course.

Required Materials

You are required to bring pencils, pens, a ruler, a folder with paper, a laptop, and a calculator to all your maths classes. It is recommended to start a new folder for each unit.

Units of Study

1. Radicals, exponents, logarithms
2. Trigonometry
3. Functions (emphasis on quadratic functions)
4. Sequences and series
5. Statistics and probability

DIS Assessment

Summative assessments will be graded on the following criteria, which have been established by the IB for mathematics in the MYP.

Criterion A	Knowledge and understanding	Maximum 8
Criterion B	Investigating patterns	Maximum 8
Criterion C	Communicating	Maximum 8
Criterion D	Applying mathematics in real-life contexts	Maximum 8

The sum of these four semester criterion grades will determine your overall semester grade according to the following table.

Sum of semester grade levels	Grade
1 - 5	1
6 - 9	2
10 - 14	3
15 - 18	4
19 - 23	5
24 - 27	6
28 - 32	7

Classroom Rules

You are expected to come to class prepared and on time. Notes are to be taken at all times. Smartphones **must not** be used during class. Calculations are to be done with the help of your calculator, if permitted. The use of laptops is only permitted if explicitly communicated by the teacher.

Calculator

You must bring your own Graphics Display Calculator (GDC) to class: Casio fx-CG50.

The Routine

A typical lesson will begin with an opening activity (“warm-up problem”) that will help you to review previous material or to prepare you for the upcoming lesson. After discussing the warm-up problem there will be a review of the homework (if any). Afterwards the new lesson will get on its way. On a test day you should arrive to class early, be seated with everything removed from your desk with the exception of a pen or pencil and required items (e.g. calculator) that were permitted beforehand.

I am looking forward to working with you!

Christian Scheibner
