

DIS Department of Mathematics

MYP grade 8 - Course Outline

Welcome! This handout will give you all relevant information about your Mathematics course and about the rules in the classroom.

Required Materials

Everyone is required to always bring pencils, pens, a ruler, a folder with paper (squared or with lines, no blank paper), a laptop, and a calculator to class. It is recommended to start a new folder for every unit.

Units of Study

- Linear equations and functions
- Ratios, proportion, percentage
- Exponents
- Irrational numbers and Pythagoras' Theorem
- Area, Perimeter, Volume
- Univariable Statistics

DIS Assessment

Summative assessments will be graded on the following criteria which have been established by the IBO for mathematics in the MYP.

Criterion A	Knowledge and understanding	Maximum 8
Criterion B	Investigating patterns	Maximum 8
Criterion C	Communicating	Maximum 8
Criterion D	Applying mathematics in real-life contexts	Maximum 8

Your semester grade for each of the four criteria will be determined based on your *best sustained performance on summative assessments*. The sum of these four semester criterion grades will determine your overall semester grade according to the following table.

Sum of semester grade levels	Grade
1 - 5	1
6 - 9	2
10 - 14	3
15 - 18	4
19 - 23	5
24 - 27	6
28 - 32	7

Classroom Rules

Every student is expected to come to class prepared and on time. Notes are to be taken at all times. Smartphones **must not** be used in class. Calculations are to be done with the help of your calculator. The use of laptops is only permitted if explicitly communicated by the teacher.

Homework

Homework will be an essential part of the course and it is due the beginning of the next lesson. Any missing homework must be made up.

Calculator

Every student must bring their own calculator (e.g. Casio fx-85ES Plus) to class.

The Routine

A typical lesson will begin with an opening activity ("warm-up problem") that will help you to review previous material or to prepare you for the upcoming lesson. After discussing the warm-up problem there will be a review of the homework. Afterwards the new lesson will get on its way. On a test day you should arrive to class early, be seated with everything removed from your desk with the exception of a pen or pencil and required items (e.g. calculator) that were permitted beforehand.

I am looking forward to working with you!

Christian Scheibner
