

Grade 10

Criterion A: Knowing and Understanding

How accurately and confidently do I use maths?

Level	What this looks like
0	I have not shown enough evidence to be assessed.
1 – 2	I can use maths for easy problems I recognise , but my answers are not always correct.
3 – 4	I can use maths for more complex familiar problems and usually get correct answers.
5 – 6	I can use maths confidently for challenging problems , and my answers are mostly correct.
7 – 8	I can use maths accurately and independently for challenging and unfamiliar problems .

Criterion B: Investigating Patterns

How well do I explore, explain, and justify patterns?

Level	What this looks like
0	I have not shown enough evidence to be assessed.
1 – 2	With help, I can find simple patterns and make basic predictions.
3 – 4	I can find patterns and suggest a general rule .
5 – 6	I can find complex patterns , explain the rule clearly, and check that it works.
7 – 8	I can confidently find complex patterns and prove or fully justify why the rule always works.

Criterion C: Communicating

How clearly and accurately do I explain my mathematical thinking?

Level	What this looks like
0	I have not shown enough evidence to be assessed.
1 – 2	I use limited maths language and diagrams , and my thinking is unclear.
3 – 4	I use some correct maths language and representations , and my explanation is understandable.
5 – 6	I use correct maths language and clear representations , and my explanation is logical.
7 – 8	I communicate my thinking clearly, accurately, and efficiently , using correct maths language throughout.

Criterion D: Applying Mathematics in Real-Life Contexts

How well do I use maths to solve real-world situations?

Level	What this looks like
0	I have not shown enough evidence to be assessed.
1 – 2	I can identify some information in a real-life problem and attempt a solution.
3 – 4	I can identify the key information , choose suitable maths, and explain my solution briefly.
5 – 6	I can solve real-life problems using the right maths and explain how accurate my answer is.
7 – 8	I can confidently solve complex real-life problems , and clearly justify my answer and its accuracy.
